4G focus for the Americas

[News Archives](#)

3G Americas, a Market Representation Partner in 3GPP, has officially announced its name change to 4G Americas.

In their News Release "[3G Americas Evolves to Next Generation](#)" Chris Pearson, President of 4G Americas, emphasised the organisations' role as a voice to represent the 3GPP technology family.

"Even though 3G technologies will lead in the marketplace for years to come, the timing is right for the name change. 4G Americas will make great efforts for a mobile broadband community using the 3GPP family of technologies to transform communications for people, businesses and societies throughout the Americas," he said.

3GPP Release 8 IMS Implementation Workshop

24 - 25 November 2010, Sophia Antipolis

ETSI has issued an open invitation to their Workshop to demonstrate current implementations of IMS equipment and to gather future needs for IMS testing.

The ETSI Technical Committee for IMS Network Testing plays a key role in developing a variety of test specifications for IMS core networks and this event is sure to attract experts from the Operator community as well as suppliers of equipment, test tools and various 3rd party integrators.
